MONITORING SOFTWARE

OBSERVER

Teletek electronics

for IRIS and SIMPO Addressable fire alarm systems

Obesrver Software is designed to monitor Teletek Electronics addressable fire alarm panels – Iris, Iris Pro and Simpo, allowing quick PC administration.
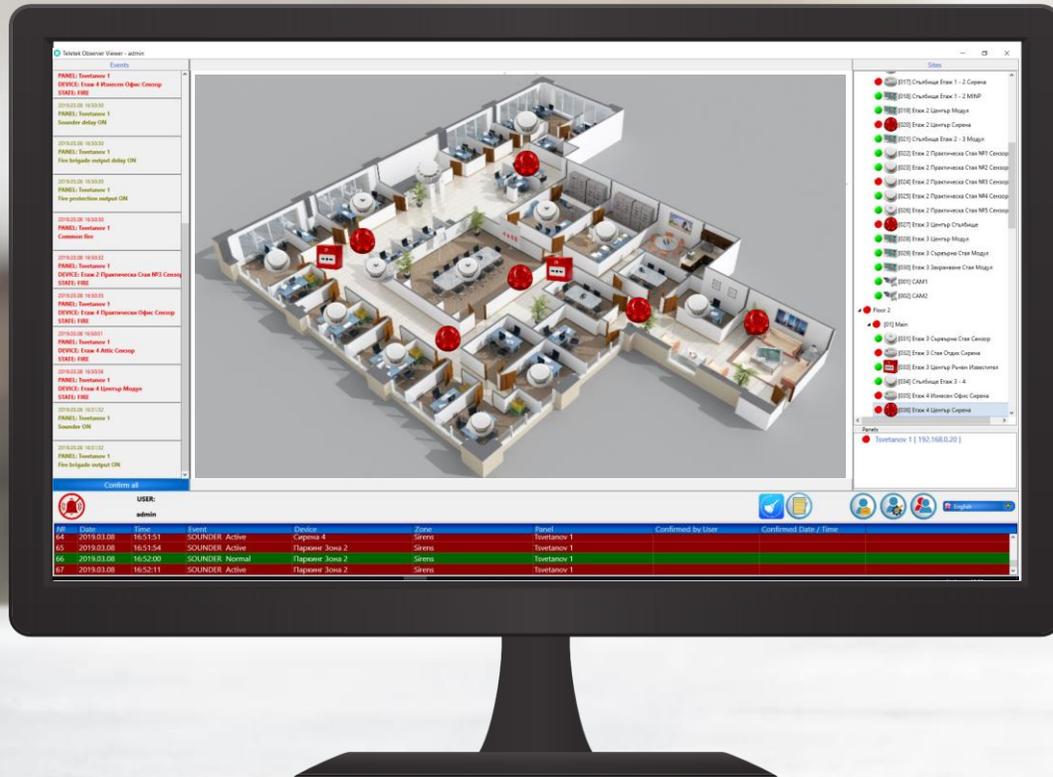

Using a simple interface, the authorised user can view the fire alarm control panel's event history, event status, device properties and other information, depending on access permissions, defined by the system's administrator.

FUNCTIONAL SPECIFICATIONS

- ✓ In accordance with the technical and functional specifications of Teletek Electronics addressable fire alarm panels

- ✓ Supports up to 64 panels IRIS, IRIS PRO and SIMPO - up to1000 devices per IRIS and IRIS PRO panels, and up to 500 devices per SIMPO panel
